Fisching, Marstiller, Rusbarsky & Wolf Engineering, Inc. provides Mechanical, Electrical, Plumbing and Fire Protection consulting engineering services for commercial buildings. We design M.E.P. systems for hospitals, surgery centers, office buildings, universities, laboratories, churches, theaters, and airports. We also perform engineering studies and site evaluations for existing buildings. We work with building owners for evaluating and designing equipment replacement projects such as water heaters, boilers, air handling units, chillers, generators, and electrical service upgrades. We use both Revit and AutoCAD to develop our construction documents.

www.class-g.org
Mike Embrescia
Mike@class-g.org

Measure and communicate your sustainable manage-
ment practices for one location or thousands quickly
and inexpensively. Your staff measures the locations' oper-
ations against 100 easy-to-understand best prac-
tices and can do so as little as an hour. The result is a
sustainability rating. Use Class-G as a comprehensive
planning tool for continuous improvement, measuring
one location against all your others, or to provide lead-
ship by transparency to all your stakeholders through
our unique communications tools. Class-G costs just
$700 per location, and less for 10 or more.

Green Building Alliance (GBA) is a community benefits
organization that inspires the creation of healthy, high
performing places for everyone by providing leadership
that connects knowledge, transformative ideas, and
collaborative action. A chapter of the U.S. Green Build-

ing Council, GBA has served as a regional catalyst for

nearly two decades. We offer over 125 different educa-
tion, training, and networking events annually, and
have created initiatives to track building performance,
lower carbon emissions, and promote green schools.
